The CoLiDo™ Story

CoLiDo™ is inextricably linked with Print-Rite, one of the world's leading print consumable companies that is always synonymous with quality, reliability and affordability. Leveraging Print-Rite's proven manufacturing capabilities, extensive engineering experience, and the core values from building the successful brand 'Print-Rite', CoLiDo™ was created to satisfy customers who are looking for user-friendly, well-performing, and cost-effective 3D printers and filaments.

Pursuit of Sustainable Values

Customer satisfaction is a key driver for our continuous improvements and innovations. To address diverse customer needs, CoLiDo™ laboratories conduct rigorous research and development.

Our goals are simple – We spearhead industry development and strengthen competitiveness whilst delivering high standards and delivering quality and technological breakthroughs.

Ultimately, we endeavor to deliver a one-stop-shop experience to all users - from beginners and hobbyists to professional makers and partners who foster innovations and creativity for wider applications.

... dream it. FEEL IT.

02

Beauty of CoLiDo™

CoLiDo™ offers a series of powerful yet affordable 3D printing solutions that allow you to create 3D prints on demand, anytime, anywhere. CoLiDo™ facilitates the customization of your real models derived from digital files.

FDM Technology

Fused Deposition Modeling (FDM) is one of the technologies used for 3D printing. It prints parts layer by layer from the bottom up.

04

Advantages of CoLiDo™

Two Colors or Materials in One Single Print

Easy and Clean

Various Build Sizes

Light and Quiet

Fun, Simple, and Stimulating

Best-of-Breed Printing Materials

Two Colors or Materials in One Single Print Opening Up New Possibilities for Many More Striking Combinations.

Equipped with only 1 nozzle, our CoLiDo™ Duo 3D printers makes it possible for you to produce 2 colors or 2 materials in a single print, or to mix & melt the colors or materials together to create a brand new combination, and with quicker speed.

Easy and Clean

The Easiest Way to Remove 3D Objects from a Glass Platform.

CoLiDo's patented glass platform allows easy removal of printed objects. No spatula or glue required, just remove the 3D objects with your bare hands without any difficulty.

Various Build Sizes

Tailored to Meet Any Industry's Diverse Requirements.

CoLiDo™ understands there is no one-size-fits-all solution. So, we give you greater flexibility to choose from build sizes of up to 1m x 1.5m in diameter to address your needs across home, school and business environments.

CoLiDo™ Mega

Light and Quiet

Providing You with a Smart Choice Quiet Printing, even On-The-Go.

CoLiDo™ is small and quiet enough to fit into your home, school, and office environments. For those who need high mobility, CoLiDo™ 3D pen, CoLiDo™ Compact, and CoLiDo™ 2.0+ / 3.0 are the best choices. With powerhouses that generate less than 30dB of noise, they are designed for silent and convenient on-the-go print performance.

Fun, Simple, and Stimulating

Turn your Cool Ideas into 3 Dimensions with our Handy 3D Gadgets.

Wherever you are and whatever you like, CoLiDo™ 3D pen gives you complete control over your inventions. Let your drawing stand on any surface.

Portable
Creates 3D designs anywhere, anytime.

Ease-of-Use
Works like a regular pen. No software installation or PC connection is required.

High Quality
Ensures smooth and seamless 3D drawing.

Safe
Auto-retracts to prevent accidentally touching the heated nozzle.

Eco-Friendly
Non-toxic and biodegradable filament.

Delta D1315

Move Fast with your Ideas.

Developed with simplicity in mind, our Delta D1315 has advantages of less complicated construction, non-moving build platform, as well as lighter moving parts, which add up to ensure high-speed and smooth prints as compared with typical Cartesian-based 3D printers. Simultaneously, CoLiDo™ D1315 requires no calibration, enabling users, especially novices, to enjoy hassle-free printing with just a few clicks away!

CoLiDo™ DIY

Scalable and Fully Responsive to your Diverse Printing Needs.

Our DIY 3D printer is made up of 6 modules only. With maker's mindset like yours, we know you enjoy a variety of experiences to do-it-yourself, to explore, discover and make a capable 3D printer your own way, thus we prepared a test bed to push your boundaries for many more amazing creations and breakthroughs.

Best-of-Breed Printing Materials

Quality Prints and Peace of Mind Guarantee.

ABS and PLA are the two commonly used 3D printing materials. Each of them has its own unique characteristics and benefits. Components of our ABS, PLA & TPU materials are manufactured using our proprietary formula that is REACH and RoHS compliant.

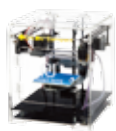

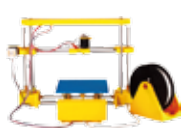

To add value to your prints, CoLiDo™ offers a wide array of standard and custom color options to enable you to deliver both natural and vivid color combinations while guaranteeing the best possible quality performance.

DLP Technology

Digital Light Processing, or DLP, is a process of using light source to solidify photopolymer resin into 3D objects. It creates highly accurate prints with excellent resolution.

Ultra High Resolution Delivering Durable, Vibrant and Impeccable Quality Prints.

CoLiDo™ DLP 2.0 creates 3D prints with resolution of up to 0.05mm. Parts produced from our DLP 3D printer are highly precise and accurate. Their surfaces are also smoother as compared with FDM 3D printers. Better yet, the resin we have developed has a fast cure time that helps speed up the whole printing process, bringing customer experience to the next level.

3D Printing Service

Getting your Designs Printed Without Hassle, and at Very Competitive Rates.

Enabled by a robust suite of 3D printers from small to mega sized, consumer-grade to industrial-grade, and printer filaments developed in-house, our 3D print-on-demand service allows you not only to achieve cost advantages but also to print in quantities of even just a single piece, and you benefit from a shorter lead time, faster go-to-market and high flexibility in inventory management as compared with traditional manufacturing.

Designers with models, organizations with rapid prototyping needs, folks with ideas that need help to come to life, simply send us your print instructions and we take care of every step in the process, including printing, post-processing, shipping, and customer service.

Post-Processing Service

Genuine, Beautifully Crafting Awaits!

Besides offering 3D printing services, we also offer professional post-processing service, which includes but is not limited to, coloring, polishing, and electro-plating.

With over a decade of experience in artistry and craftsmanship, we endeavor to deliver the service with high quality and accelerated speed. Most important of all, we are keen to craft and deliver the kind of service that can present the print object as true-to-life as possible.

Company at a Glance

Print-Rite is a global print consumables company specializing in the development, manufacture and supply of 3D printers and filaments, ribbons, inks, inkjet cartridges, toner, laser toner cartridges, OPC drums and chips. With over 30 years of experience in print consumables industry, Print-Rite has a well-earned reputation for delivering reliable and cost-effective print consumables all over the world.

We never stop innovating. Print-Rite has been a forerunner in bringing the 2D to 3D print concept to reality. CoLiDo™— an exceptional brand that delivers a series of robust yet affordable desktop 3D printing solutions to facilitate a journey of limitless possibilities anytime, anywhere.

Fast Facts

Year of Foundation	1981
Headquarters	Hong Kong
Industry	Print Consumables, 3D Printing & Supplies
Portfolio	10,000+ consumable models sold in 120 countries and regions worldwide
Production Capacity	1.5 million of toner cartridges / month 5 millions of inkjet cartridges / month 6 millions of ribbons / month 400 thousands of copier toner kits / month
Reseller Network	3,000+
Gross Floor Area of Workplace	500,000+ sq. m
R&D Technicians	800
Patents	2,500+
Certification	ISO 9001, ISO 14001, IECQ HSPM QC 080000, CE, REACH, RoHS
